My name is Jonathan Hartman. I'm a 22 year old management major from Annapolis, MD. I'm pursuing the Operations Management track with a certificate in Operations & Information Management. I'm currently a member of the Finance Board within UCSU, and have worked for the past two years as an independent web designer/programmer for the University to earn my beer money. This last summer, I had a great experience interning at TeleCommunication Systems Inc. in Annapolis.

I highly prefer working on teams to working individually, and always make a conscious effort to be present and contributing to the group. I'm usually able to contribute the most when it comes to writing and creative endeavors – crunching numbers isn't a personal strong suite. Having worked as a web site designer for the past few years, I've had lots of experience with a slew of different computer applications and believe I can offer above average technical skills to a group.

Would like to be part of a group that all shows up on time, contributes equally, and has fun. Email: hartmanj@colorado.edu
