Hi Terry and Tom,

I was thinking about possible terms of a deal on the racism/sexism paper. Karl isn't 100% sure he wants to collaborate and is saying that at this point in his career he would probably prefer to run lab studies to bolster our data, rather than be one of several co-authors.

One idea to consider is that we could exchange my data analysis labor for the release of the Clubcorp racism/sexism data. For example, I could more thoroughly analyze the manipulation, and/or I could help you find another paper idea that either of you could lead. In exchange, Karl and I would remain the only two authors on the racism/sexism paper.

Anyways, this might be a way for everybody to win.

Thanks,
David
